

Autonomic Platform

Chairman:
François Jolles
IUCN

Chairman:
Ali Malaz
Tubiyad

What we have found!

The key conclusions from the session:

- **Governance is Key**
 - IT architecture
 - Security Guidelines
 - Data ownership
 - Privacy statement
 - Who governs the decision the autonomic platform makes? Who is responsible
 - Risk management
 - Who can sign-off, who is liable
- We still need minimum 2-3 years time to get it as a commodity
- Number one benefit is speed
- With A.P., additional operation costs are almost flat
- A.P does not work with old legacy system

What we have explored

Among these conclusions, we have developed one of these in greater detail below:

Organizational Impact

- New talents/new profiles
- Need to train your people to new roles and adapt their skills
- Convince Management and Peers
- Change of the border between Business and IT

What we have left open...

Some questions still remain to be addressed:

- No vendor comes with the whole integrated systems
- Very few skillset available within the companies
- **Cultural Impact**
 - Variability of Ethics in time and by Geography
 - Social impact of automation

A picture is worth a thousand words

An illustration that sums up our results:
